## Chairman of State Administration Council Prime Minister Senior General Min Aung Hlaing Meets Officials from Ministry of Agriculture, Live-stock and Irrigation to Discuss about Agricultural Development

The Chairman of the State Administration Council (SAC) Prime Minister Senior General Min Aung Hlaing arrived at the Department of Agricultural Research in Zeyathiri Township in Nay Pyi Taw Council area on 14 June, and met officials from the Ministry of Agriculture, Livestock and Irrigation to discuss about agricultural sector development.

During the event, officials reported on agricultural research on various crops, test cultivation with bio and chemical fertilizers for plant nutrients, research on soil maintenance, and conducting of agricultural and livestock diploma courses.

After hearing the reports, the Chairman of the SAC Prime Minister discussed as follows:

- Research and development are a crucial process for a country. It is necessary to have good yields and quality in agricultural products. So, efforts must be made to get quality strains through research
- Agriculture and livestock are interrelated and benefit each other. Agricultural products can be shifted as feedstuff and

waste from cattle can be used as bio-fertilizers. Hence, research must be conducted on the production of fertilizers.

- There are 33 million acres of sown acreage, 14 million acres of monsoon paddy and some three million acres of summer paddy. If crops can be grown on that land through a double-cropping system, paddy production will increase.
- As for the livestock breeding sector, chickens, pigs, goat, cows and fish are mainly consumed in Myanmar. Therefore, it is vital to consult livestock breeding experts in doing livestock businesses. Therefore, measures are being taken to open agriculture and livestock breeding institutes, colleges and universities when the Prime Minister served as the Chairman of the SAC.
- If the institutions turn out professionals in the agriculture and livestock sectors, human resources for these sectors will be adequate for operations. Technical training schools will be established in newly-formed districts.

## Statement on Informants to be Rewarded Deservingly

Under the guidance of terrorist organizations, PDF terrorists are conducting various acts of terrorism to instil fears among Buddhist monks who are totally apolitical, civil servants and ordinary people in order to undermine the administrative mechanism

of the government. Therefore, Central Committee on Counter-Terrorism released a statement describing that informants who can report on them regarding the terrorists will be rewarded deservingly and effective protections will be provided.

### Statement

With an ulterior motive for weakening the administrative mechanism of the government, PDF groups organized by CRPH and NUG terrorist groups are committing serious crimes of killing ward and village administrators, 100-household leaders and 10-household leaders and civil servants. They are also threatening or slaying teachers, planting and detonating bombs at schools so that students do not dare to go to school. Moreover, to strike terror into the public, they are murdering innocent and peace-loving people as well as Buddhist monks who are totally apolitical.

Buddhism is a religion most of the people in Myanmar profess and it is also a religion that commands high respect of people all over the world. In Myanmar, the overwhelmingly Buddhist nation, slaughtering Buddhist monks, who are following noble practices and living a moral life, makes the image of the country and the people very ugly.

This being the case, people are urged to take an active part in exposing suspects so that effective action can be taken against them and those who give information leading to their arrest will be rewarded deservingly.
